

## 'SNOBBERIES OF 1930' SELECTED FOR SHOW TITLE

Burlesque Figure of Professor Rogers' Snob is Hero Of Production

### SHOW IS MUSICAL REVUE

Tickets Offered as Prizes in Poster Competition Opening Today

Choosing as its hero the mythical figure of a snob who would follow the advice of Professor Robert E. Rogers of the English Department by marrying the boss' daughter, this year's Tech Show will present "Snobberies of 1930" as its thirty-second annual production. The Boston showings will be given at the Fine Arts Theatre from February 18 to 22. Following the Boston performance, the show will be given in New York.

"Snobberies of 1930" is a musical revue with many short skits and dance numbers, and it is being staged on the general plan which made last year's production one of the best of Tech Shows. The authors of the revue are John M. Cleveland '31, and Adolph H. Feibel '32.

#### Snob Hero of Show

The burlesque figure of the snob moves through the second act with amusing consequences brought about by his indecision in making a choice between the boss' daughter and an attractive stenographer for a wife. His final decision, which he is driven to by despair at ever meeting the right boss' daughter, provides one of the mirthful highlights of the show. The first act carries the snob through his years at the Institute.

Several original musical numbers will be included in the production. Carl Connable '30, Clarence W. Farr '33, David Ballantine '34, Willis Fleisher '31, J. M. Cleveland, and A. H. Feibel are the writers of the music and lyrics. A larger chorus than was used previously is being trained and many dances are being arranged.

The competition for the Tech Show poster opens today. Prizes of four tickets for first place and two for second are being offered. The poster must contain the words "Tech Show" and "Snobberies of 1930." All work should be handed in to Professor William Emerson at the Rogers Building before noon Monday, January 6. Two colors beside white may be used on the poster.

## MUSICAL CLUBS GIVE CHRISTMAS CONCERT

Program Followed by Dancing Until Two O'clock

With an appropriate setting of fir trees and wreaths as a background the Combined Musical Clubs gave its annual Christmas concert and dance at Longwood Towers last Friday evening. A large crowd was present to listen to the music and to participate in the dance.

The concert program started at 8:30 o'clock with a number of selections of popular songs by the Banjo Club. This was followed by the singing of several numbers by the Glee Club. Donald L. Girard '31 and George F. Frazier '32 put on a specialty musical act which was followed by several classical renditions by the instrumental club.

The program, continued with several selections of popular airs by the Technicians and the program ended at 10:30 o'clock with the singing of "Take me back to Tech" and "The Stein Song" by the Glee Club.

## TECHNIQUE STARTS FALL COMPETITION

Technique's managing board has established nine new positions to constitute a Sophomore board. The new officers include: two assistant advertising managers, two assistant literary managers, one assistant department editor, two assistant circulation editors, one assistant art editor, and one assistant photographic manager.

"Elections to these positions offer an exceptional opportunity for advancement to the managing board of Technique," stated Parker H. Starrrett '30, general manager. Competition for these positions will start tomorrow at a meeting in the Technique office at 5 o'clock.

## Seniors Abandon Rogers as Scene For Fall Dance

Junior Class Officers Chosen To Act as Ushers for Annual Affair

Walker Memorial Main Hall, which this year seems to be increasingly popular as a scene for dances, will house the annual Senior fall dance this Friday. Formerly, these dances were held in the Rogers Building but this year it was changed to the student activity building in keeping with the general trend of Technology dances.

Ferns, palms, and other plants which will blend with the new draperies and other decorations of the hall will be used and unusual lighting effects are also promised. The orchestra as at the tea dance held last year will be placed in the center which seems to overcome the acoustical difficulties of the hall.

In former years, an admission charge of \$1.50-\$2 was usually made but this year the tickets will be distributed free. They may be obtained in the Main Lobby between 9-10, 12-2, and 4:30-5:30 o'clock. All Seniors are urged by the committee to obtain their tickets as soon as possible in order that the number expecting to attend may be known.

Officers of the Junior Class have been chosen to act as ushers for the affair. These men are Horace S. Ford, Jr., J. Harold Genrich, Ralph Davis, Kenneth W. Smith, Harold P. Champ-lain, Robert T. Leadbetter, John M. MacBrayne, Jr., and Gilbert M. Roddy.

## LIGHT SCRIMMAGE PREPARES HOCKEY TEAM FOR OPENER

Starting Line-up Depends on Showing Made During Coming Week

### PROSPECTS ARE BRIGHT

With the first game of the season only a few days away, Coach Bill Stewart is gradually shaping his hockey squad into a smoothly working machine. Boston University is the first opponent on a very good schedule and will meet the Technology team on Friday night at the Boston Arena. B. U. has been practising since October 30, but will be forced to extend themselves to hold the Beavers.

#### Teams Hold Scrimmage

Last Friday evening the Varsity and second team met for the first time in a light scrimmage. No position has been definitely won and the showing made in practise this week will determine the starting lineup. Riley as goalie, Peterson and Hazeltine defense, Lucey at center, and Captain Cullinan and Hall as wings composed the Varsity team in the scrimmage. Cullinan, Hall, and Peterson looked good, while Wayne and Ford added strength to the second team.

#### Large Attendance

A squad of more than twenty men at each practise indicates the enthusiasm among the candidates, and with the improvement shown by many of the men, a very successful season is expected. Wyszynski, a transfer from Brown, will be eligible and is a promising candidate. Standing six feet two inches and weighing two hundred pounds, he will make a formidable defense man. Regan, of last year's freshman team, is showing well with his stick work and Hall by improving his shooting one hundred per cent.

(Continued from Page 3)

## ENGINEERS TROUNCE NEW BEDFORD TEAM 56 TO 18 IN OPENER

Col. Green Will Be Host to Radio Society Saturday

Members Will Visit Round Hill Estate on First Field Trip of Year

The estate of Colonel E. H. R. Green at Round Hill will be the objective of the members of the M. I. T. Radio Society next Saturday morning when they embark on their first field trip of the school year. The trip will be made in busses, which leave from in front of Walker Memorial at 10:30 o'clock.

The various features of the trip have been briefly outlined by A. Earl Cullum '31, President of the Society. The Round Hill estate has been placed at the disposal of the Institute for experimental purposes, and has recently been the scene of considerable research work in radio, aeronautics, and meteorology. There the party will have an opportunity to inspect the radio station, as well as the laboratories and the balloon and airplane hangars.

A side trip will be taken to Station WCC of the Radio Corporation of America at Marion. This station is equipped for transmission on both long and short wavelengths, and is used for handling commercial messages.

The trip will be made in Gray Line busses. Those who wish to go are asked to sign up in the main lobby immediately.

MOTTER, AT CENTER, IS HIGH POINT MAN FOR M. I. T. CAGERS

Substitutes Go in After First Ten Minutes of Play—Johnson Good

### MEET BRUINS WEDNESDAY

Trouncing their first opponent 56 to 18, the Engineer basketball team defeated New Bedford Textile Saturday night in the Hangar Gym for their first victory this season. Although their victory was won by a bigger margin than the 39 to 15 score of last year, the New Bedford team proved to be less formidable than their predecessors. Dave Motter was high point man of the game scoring 8 field goals bettering his record of five against New Bedford last year. Nee was second to Motter with 5.

#### M. I. T. Plays Offense

Motter, Harrison, Nee, Captain Nelson, and Lawson, started for the Engineers and swept the Textile cagers off of their feet in a fast offensive. The Engineers were shooting with unerring accuracy under the basket, making a higher percentage of the shots than last year's five. Although the team was a little ragged in their passing, they did well to duplicate the famous machine mentored by Coach McCarthy last year. After running up a comfortable score, Paul and Johnson went in for Nelson and Motter, and played an excellent game against Textile. Paul showed lack of practise probably due to the period of idleness after his injury in the Field Day football game. Johnson, however, proved to be the outstanding second string man in the game, scoring 4 field goals for the Engineers. He looks promising at the position of guard, and will probably see action in most of the games this season. Nee also played a sterling game making 5 field goals at the position of forward, showing himself to be fully capable of holding down this berth on the first string.

In the second half, all of the first team was taken out and the seconds carried on, turning the game into a mad scramble. Passing was poor on both sides, and the New Bedford forwards were unable to score except on long shots which occasionally went through. Pierce, who was high point man for the New Bedford Combination, sank only three goals from the floor. Their failure to score was due more to their own poor passing and lack of practise than the M. I. T. defense.

(Continued on Page 3)

## CRAM REVIEWS HIS WORK ON CATHEDRAL

Designer of Colossal Edifice Explains Construction

"Architecture is at the present time in a higher state of development than at any time during the past two hundred years." This is the opinion of Mr. Ralph Adams Cram, prominent Boston architect, designer of the buildings at Princeton University, re-designer of the Cathedral of Saint John the Divine in New York City, and speaker at the first of this fall's Aldred Lectures, held last Friday afternoon.

Mr. Cram's talk began with a short summary of the development of the science of architecture during the last few centuries, giving his reasons for making the statement quoted above. The substance of the lecture was a discussion of many of the architectural problems met with in the design of the Cathedral, which Mr. Cram has been working on for the last fifteen years. Points were well emphasized and illustrated by slides, depicting many of the tentative plans made for the structure, a few of the completed plans, and many views of the actual construction work on the edifice.

Mr. Cram displayed a remarkable ability to treat his highly technical subject in a manner easily comprehensible to the audience, made up for the larger part, of students with little or no knowledge of architectural practise or nomenclature.

## VOO DOO, OUT OF JOKES, FILLS ISSUE BY VENTING SPLEEN PITIFULLY ON THE TECH

Editor's Note: This article is being printed for enough in advance so that "Voo Doo" can prevent the appearance of their supplement attempting to imitate THE TECH. It is hoped that they will see the pettiness of the thing, and the foolishness of boring the undergraduates with discussion of a worn-out controversy.

"Voo Doo", our estimable contemporary, has run out of material. With "College Humor" on the decline, there is no source even of purloined wit. And so there commences a war with THE TECH.

When the present managing board of Technology's self-styled humorous publication took office last spring, restrictions on using "jokes" concerning THE TECH were included in the "Verboten" list. As for the rest of this list, the board fears faculty expulsion if it exceeds the bounds of broad minded propriety, at least. Thus cramped in style, they have had to fill their columns with feeble attempts at wit at the expense of THE TECH.

We print herewith an unabridged copy of the Proclamation of War, as issued by the Managing Editor. The campaign continues with a hand bill, to be spread in the corridors tomorrow, advertising a special THE TECH supplement. Some of the weak-minded witticisms which will be found in this supplement when it appears Wednesday we are publishing below.

We realize that "Voo Doo" is in a bad way financially and editorially. Anything is better than what we have seen in recent issues. We are flattered to be considered good material for the magazine, and are gratified for this opportunity to aid a worthy cause.

Editor THE TECH

Dear Sir:

Never before has Phosphorus so truly appreciated the sagacity of that old adage, "no news is good news". Having gratis copies of your estimable "thrice weekly" placed in our office, we sometimes break caste and peruse the same only to find (on the last page) a very weak attempt at venom where an unbiased critical review should have appeared.

It would seem that the Voo Doo Board has been sadly misinformed regarding the alleged truce between Technology's two antonymous publications. However, that was not our fond dream so, no matter.

Hereafter kindly refrain from cluttering the Voo Doo sanctum with prying reporters seeking page proofs if

the most recent spasm is the best you can produce in the way of literary resumé.

Yours very truly,  
(Signed) OTIS A. SIBLEY,  
Managing Editor

P.S.—Herewith is our permission to use the above in the open forum should you so desire.

O. A. S.

Thus is laid to our columns the act which precipitated the struggle which seems now to be in progress. Yet we leave to the student body whether our criticism was justified after the aviation Number. We firmly believe it was a charitable review. THE TECH prints news and unbiased comments in its columns, and not what is asked to say. Consultation with our business department in the matter of paid advertising may bring "Voo Doo" the favorable publicity which it so badly needs and which is hard to get by ordinary means.

A few of their feature articles printed verbatim follow:

Starting off with a whirlwind attack resulting in three goals during the first period, the Engineer harriers decedely defeated Holy Curse collidge by the decisive score of shrdlu shrdlus-hrdlu etain four feet ten and one half inches. D. T. Zwolf, one hundred and eighty five pounds. Coach D. T. Hoines says that the varsity will soon be out in their eight seater; coming into the home stretch after the five mile jog, Captain Ulch tripped over an old dirgible which someone had carelessly left lying in his path. He however managed to cover the remaining distance on foot. This gave the Engineer booters a decisive victory Thysxrdlu shrdlu if.

Of course this may be humor, but to paraphrase "Voo Doo" puerile dribblings" are hardly worthy of a mature mind.

\* \* \*

(Don't from page 9)

"1930 Prom to be held on Tech Field. Os Hedlund to referee annual briwl, after which undergraduates joined in singing "Rake me beck to Tech" and "The Stain Song". Dorm men were not permitted to attend and owing to the ban on fraternities and commuters, the only ones present were Joe Smilch, Jan. Bldg. 10, and Joe Smilch, Asst. Dean of Students. It is

hoped that last year's prom will be as big as success as next years."

This constituted about the best piece of writing in the entire section. Judge for yourself concerning the level of wit and good taste. No doubt Voo Doo has lofty purposes in mind in casting a "Smilch" on the administration of the Institute.

\* \* \*

T. C. A. HAS GREATEST DRIVE Old Hearse Used for Campaign

A grand tota lwes reached today when the T. C. A. closed its coffins and refused to accept another red cent (also blue chips) from the shudent bloody. The contributions to date are \$11.97, two collar buttons and fourteen Tech coupons. The President, D. T. Pattison states that a banquet costing \$11.97 will be held soon to celebrate the unexpected success of the drive. Bids are being received from leading lunch carts and low dives such as— (to be continued in an early)"

After groping through misspellings (these are supposed to have a purpose), we gathered that the belligerent brood of Phosphorus are opening fire on undergraduate activities in general, starting with those whose causes most worthy. It might help to point out that the donation to Pattison of the initials "D. T." may be just another little attempt at humor, war, or something on that order. We are uncertain as to the correct name for this kind of offense.

\* \* \*

"The Lunger"

What this school needs, the Lunger thinks, if at all, and why not? We entirely disagree with everybody, and so does D. T. Houston, who we think, if at all and why not, is one of the finest lads we have ever met because sometimes he writes the Lunger column and when he does it is even sadder than when the little harelip halfbreed freshmen propogated by THE TECH do it, according to the Lunger. THE TECH THE TECH THE TECH

The Lunger as he was pursuing his meditative way through the noisy halls of Building Ten on his way to the Ema Rogers Room, happened by the door of the Bersar's office. As he paused with his best ear to the keyhole, he herd D T Huston saying to D T. Lunger, "Listen, Houston, these rats up (Continued on Page 4)

### PROFESSORIAL DIGNITY

IN these first few months of school, when the student is making new contacts among the instructing staff, he is brought forcibly to the idea that there are two types of instructors; namely, those who teach the subjects, and those who teach the students. Among any group of instructors who are being discussed, the latter are by far the favorites, while the former for the most part receive the disapprobation of all.

There is much to be said for the pedagogue who can step down from his pedestal of learning and rub elbows with those so far below him in the scale of education. But on the other hand, the teacher of a subject accomplishes his purpose without the friendly associations and human contacts. Few men of great learning care to break down the barriers of reserve to everyone with whom they come into contact. They need only the close friendship of a few, and the opportunity to pursue without interruption the profession or avocation of their choice.

It is truly a great experience to come into close contact with these men, and opportunity is closer at hand at a scientific institution than at a college. There is a human being behind each of the uncomplimentary nicknames that abound here at Technology. When it is not the nature of the instructor to come three-quarters of the way, it is up to the student to see that he knows the man who is preparing him for life.

### "USE WALKER"

TO aid in opening auspiciously the first real social season which Walker Memorial has ever known is the duty of every Senior this Friday night. On that evening the Class of 1930 will usher in the changing order with the Senior Prom, held for the first time in Walker Main Hall. If that dance is not a big success, there is reason to expect that the well-laid plans for a Walker which really serves its purpose will fail.

Those who conceived the original ideas for Walker Memorial were of the unanimous opinion that the building should be truly a center for all student activities. There were to be held the various social functions; lounges were to provide space for relaxation and amusement; libraries would furnish a wide choice of books on many subjects. Most important of all, in view of the present situation, were the plans for having a dining service a unit in itself, separated completely from the rest, located in a wing.

Everyone realizes these plans have failed or been modified. There is cramped space for student activities, to be sure; there are meager lounges and a small library already filled to overflowing. But the dining service necessarily usurps the beautiful main lounge, and its presence has bred a prejudice against holding dances in their rightful place.

It will be difficult to bring about changes to rectify all these difficulties. The preliminary step in the furtherance of the ambitious plans now on foot is to demonstrate that the student body would use Walker in its changed form. Paradoxical as it may seem, the only way open to us to show the authorities what is wrong with Walker is to use the building as it is. Everyone admits it is inadequate, but such dissension usually takes the form of ineffectual "gripping". Until it is definitely proved that Technology men sincerely desire a student center worthy of the name, there can be no steps taken towards the necessary remodeling.

To provide the incentive for official action, it has been decided to initiate a campaign to "Use Walker". It is urged that all possible student affairs be held in the building, and with this sentiment the dining service is heartily in accord. Everyone concerned is anxious to cooperate.

On the Class of 1930 rests the first responsibility. But theirs is no arduous duty. All that is required of them is that each member accept, during the next three days, at no expense whatever, a ticket to the dance. The music is guaranteed, and all other arrangements point towards success. It must be that, for on it depend the rest of the year's events. With failure at this dance the whole plan, affecting the Institute as it does for many years to come, is likely to collapse.

### As We See the Movies

#### THE METROPOLITAN

In "A Most Immoral Lady" at the Metropolitan this week, Leatrice Joy and Sidney Blackmer appear as the financially weak married couple in high society. Forced by circumstances to practise petty blackmail, Miss Joy as Laura exercises all her charm on a middle-aged millionaire of her acquaintance. She is successful, and things go smoothly until they reach the end of their finances again. This time she has fallen in love with a young man in the social set, and her husband, finding him in their apartment, plays the same game against her will.

Her lover immediately marries a young rival of Laura's, and Laura leaves her husband. Their next meeting is in Paris, where Laura is earning her living by singing in a night club, and her former rival is seeking a divorce. There is a reconciliation and a fadeout with the two dancing happily together.

The husband, played by Sidney Blackmer, takes the part well, and one finds it hard to blame his wife for unscrupulous dealings when she is so obviously forced to it. The gentleman is really more immoral than the lady. Robert Edeson has a rather unsatisfactory part, and is given little opportunity to show his possibilities. Josephine Dunn plays the part of Laura's rival, and does so well that it is easy to despise her for her flippancy.

The stage show, "Ingenuess' Gambol" is composed entirely of girls, so diverse in their possibilities that it is nearly a variety show. Belle Baker, of far-reaching vaudeville fame, sings and talks on the stage. Her performance would be much more effective if she modified her mannish stride. The Orchestra plays selections from Friml's compositions, led by Gabriel Hines, finishing off with the ever-popular "Indian Love Call."

### AWAY FROM THE GRIND

#### PHI GAMMA DELTA

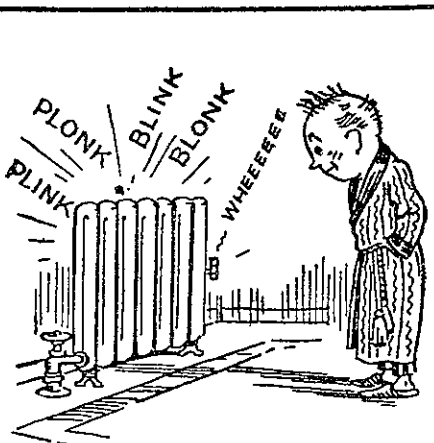

The Phi Gamma Delta House was the scene last Friday evening of a small, formal, closed dance. There were about seventy-five couples present, and the music was furnished by Dick Edwards' Orchestra. Dr. and Mrs. Conrad Smith were chaperones for the occasion.

#### PHI SIGMA KAPPA

A small tea dance was held last Saturday afternoon at the Phi Sigma Kappa House, with Roy Lamson and his Harvardians furnishing the music. Sixty couples enjoyed the affair, and sandwiches were served at the conclusion of the dancing.

#### SIGMA NU

About twenty couples were present at an informal closed dance that was held by the Sigma Nu's last Friday evening. Music came via the radio and the victrola. At about 12:30 the dance broke up, and many of the guests departed for other fraternity dances or for the Musical Clubs' Dance.

It's no vain hope for you to be in harmony with the season when you dress, for our stock of sack suits for Winter offers you every chance.

Seasonal colors and patterns, as well as fabrics; full or half-lined as you like.

Styles that are correct for gentlemen who want to look as young as they feel, as well as the more conservative models.

Single and double-breasted, and all hand-tailored. \$40. to \$85.

Winter overcoats, from \$45.

ROGERS PEET COMPANY  
formerly  
Macullar Parker Company  
Tremont Street at Bromfield

At a meeting of over two hundred co-eds of McGill University a resolution was adopted calling for the admission of women to the student council at McGill. The minutes of the meeting were sent to the student council, and it is expected that the question will be included in the platforms in the next all-University election.

Student workers in the University of Colorado were granted a prolonged Christmas vacation if their scholarship is passing. This action was taken on petition for more working days at Yuletide jobs. Because the holiday falls on a Wednesday the petition would imply a three weeks vacation extending from December 13 through New Year's day.

ENGINEERS TROUNCE  
NEW BEDFORD TEAM

(Continued from page 1)  
fense. Johnson got away for a nice shot under the goal in the early part of the second after going through most of the opposing team. MacDowell who went in at the half at center led the offense in the second period, playing an excellent game. In the last few minutes of play, the first lineup went in again, going through a practise session to end the game.  
Although the Engineers were able to score against their opponents at will, whether they will be able to sink as large a percentage of their shots as they did against New Bedford against Brown Wednesday is doubtful. Their first real battle will come against the Bruins of which little is known as it is their first game this season.

Endurance Pinochlers  
Get Photograph Taken

Anything which reeks of endurance, non-stop qualities, or continued monotony seems to draw the attention of newspapers, as can be assumed from the attention which has been shown to the 13½ hour pinochle game which was played by five dormitory men a week ago. No sooner had the account been noticed in THE TECH of this unusual feat than a photographer and reporter from one of Boston's newspapers assembled the group and pictured them in action. The unfortunate part of the picture which will probably appear in the near future is that the entire cast of the original game could not be obtained and the newspaper had to be contented with substitutions of men who had never played before.

GYMNASTS EXHIBIT  
AT POSSE NISSEN

Freshmen Look Good in Meet  
—But Team Shows Lack  
Of Training

Posse Nissen School was the scene of the opening exhibition of the gym team last Friday evening. Assistant Manager Robson arranged for the exhibition which was followed by informal dancing on the floor of the gymnasium. As a whole the team showed marked lack of training in their work, but the freshmen showed up exceptionally well. The freshmen were entered in the exhibition in order to see what they could do under conditions encountered in a meet. Their work fully justified their entrance.

Barnett Wins Rope Climb  
In the rope climb Barnett, Freeman, and Knapp competed. Barnett turned in the best time for the three men in the climb. On the high bar, Freeman, Getting, and Platt were the exhibiting members of the team. Newkirk, Sidur, and Wagner were the men to perform on the rings. On the side horse, Knapp and Getting exhibited. Coach Forest was one of the men to work out on the parallel bars. With him were Barnett and Ericson. Coach Dolloff led off the tumbling exhibitors. Farr, Freeman, and Nelson were the team members to perform in this event.

HOCKEY TEAM TRAINS  
FOR SEASON OPENER

Varsity Meets Second Team in  
Light Practise Game

(Continued from page 1)  
cent is putting them in from all angles. An increase in weight has overcome his handicap of last year. Whiston, Coleman, and Hanson are competing with Riley for his old position as goaltender.

Evening Practise  
The majority of practising from now on will be held in the evenings at either 5 or 6 o'clock to give more men an opportunity to practise. Freshmen will be called out in about 10 days and will practise with the Varsity. Members of last year's freshman team have made an excellent showing already this season, a fact which should encourage all freshmen hockey enthusiasts.

A game has been arranged with Northeastern University for December 29, and practise will be held during the holidays if a sufficient number of the squad are interested. The first game for the freshmen team is with Newton High on January 4 and will be played at Newton.

Several changes have been made in the line-up and more may be made. Lucey has been shifted from the defense to center where he is taking hold rather well. Carrying the puck down the ice seems to be one of his strong points. As a whole the squad looks as good as could be expected and with the veterans as nucleus, a powerful combination will be developed.

Rutgers, can't carry a cane until Rutgers wins a gridiron game for Lafayette. He made a promise to the students in 1926 that he would put the stick away until the team from his institution won that game.

A handful of men went into a room at tropic temperature recently at the Harvard Medical School, worked feverishly to develop a sweat and then walked out into the cold street trying to catch colds, and "unfortunately" they were not successful. So they're going into the same room, this time with a temperature as far below freezing as it is possible to make it. They will work some more and then go out and try to catch colds again. They are working with Dr. W. G. Smilie, head of the public health administration at Harvard, who has been interested in the sneezings of the human race for a long time, and who expects to devote the rest of his life finding out just what these colds are all about.

RIFLE TEAM WINS  
FROM BOSTON CLUB  
IN SECOND MATCH

Engineers Show Great Ability  
And Promise to Make  
Good Record

FACE HEAVY SCHEDULE

Technology's rifle team won another victory last Friday evening, defeating the Greater Boston Rifle Club by 35 points in a ten man shoulder-to-shoulder match. The Boston team, which is one of the civilian out-fits in New England, is composed largely of ex-service men and officers, but they were handicapped by not having all their men present.

Second Win  
This is the second match that the Engineer riflemen have won from the Greater Boston Rifle Club. The first encounter was taken by Technology with a 20-point margin.

The Beaver team is shooting extremely well at this early point in the season, and by all appearances should break its own record set last year. All but three of last year's Varsity men are back with the squad, and the absences will be more than compensated by seven very promising new candidates who come mainly from last season's freshman team.

Good Schedule

The schedule for the coming season includes two trips, one being to the eastern National shoulder-to-shoulder match at New York on April 5. The other includes two shoulder-to-shoulder matches, one with George Washington University at Washington on March 28, and the other with Navy at Annapolis on March 29.  
To date the team has about 37 telegraphic matches arranged, and about 30 more are expected before the schedule is complete. These, together with shoulder-to-shoulder matches with local teams, should give the Technology riflemen few leisure moments during the year.

BASEBALL INTEREST  
RECEIVING IMPETUS

Enthusiastic Ball Players to  
Meet in Hangar Today

Again an optimistic soul is trying to establish Varsity baseball as an Institute sport. After the Technology team of 1928 was disbanded, inter-class baseball was given a trial and the results showed a strong interest in the sport. This year, led by Meyer White '31, an attempt is being made to reorganize the team.

It is expected that all men interested will attend the meeting to be held at 5 o'clock in the Hangar Gym. Before the team can be organized there must be a sufficiently large turnout of men to convince the Advisory Council on Athletics that the plan is practical.

Much Good Material

The material for a good team is in evidence at the Institute, particularly in the Junior class. Abbott, who pitched for his freshman team; Harrison, pitcher and star third baseman of the Class of 1931 team; Riley, first baseman of the old Beavers; and Lamoretti, catcher, are sufficient to form the basis of a team should baseball be recognized.

A Sophomore attack on the annual freshman banquet at Rutgers prolonged itself into a heavy siege. For over nine hours missiles flew, and not until police arrived at the melee, and requested two hundred and fifty young men to accompany them, did peace and harmony reign. It seems that the judge who heard their case had a sense of humor or was naturally kind-hearted for he suspended sentence on all two hundred and fifty.

A Texas University has incorporated into its rules and regulations a clause making attendance at tradition-teaching classes compulsory to freshmen. The course, dubbed by Sophomores as "fish school," obviously aims to acquaint the new student with manner, customs and history of the old grads. The sophistication and experience of added years has evidently given the upperclassmen a clear insight into the subject, enabling them to link alumni and their traditions with ichthyology.

Seven persons are laboring each day in the attic of Angell hall, Ann Arbor, compiling an early modern English dictionary, which will be more than five volumes when completed. Some of the material for the dictionary was prepared over 50 years ago for the editors of the Oxford English dictionary which was published last year. English professors from all over the United States have contributed words, with information as to their origin.

It takes 15 days for the average human body to recover from the loss of two consecutive nights' sleep.

SPIKES

Captain Ladd of the Varsity track team is getting the relay teams started on their campaign for the coming board season. He has been working out with Berry and Reynolds of last year's Varsity team and has been assisting Coach Hedlund in the work being done to get last year's freshmen into shape. Among these men are Jewett, Hall, Mulliken, and Lynch. Gonzalez and Brown are also competing for berths on the one-mile team.

Herbert and Baltzer come up from last year's practise two-mile relay team to lead the men on the team this year. Thorsen, Gilman, Leadbetter, and Medrano are among those out for this event.

In the winter field events Coon and Sullivan are showing up the best in the high jump, while Snow in the pole vault and Grondal in the shot put are doing the best work. The field event men are to take part in the Boston Y. M. C. A. games in January. This will be their first encounter of the indoor season.

Manager Fisk and John Genrich, who have been forced out of competition due to appendicitis this fall, are expected to be back in the training some time during January. It is possible that both men will go under the knife during the Christmas vacation.

Don Gilman is one of the few men who have won their first straight "T" in their Sophomore year. He was awarded this honor at the Advisory Council meeting last Monday. If he keeps up the pace he is hitting now there is a likelihood that he may break the record of Elmer Sanborn during his stay at the Institute. Sanborn graduated in the class of 1923 with five "T's" to his credit.

The first handicap meet of the board season will be held on Saturday afternoon, December fourteenth.

Pete Kirwin, captain of cross-country in 1927, and Chuck Worthen, captain of the same sport in 1928, will assist Coach Hedlund with the long distance men on the boards this winter.

At last the field event men are to receive the long awaited news. Next year the Hangar Gym will house a new pit for the high jump, broad jump, shot put, pole vault, hurdles, and dashes. This is made possible by the removal of the Polo team's practise horse. This will be taken out in the near future due to the fact that the Advisory Council has refused this team recognition.

"Reducing" tables have been instituted in the various dormitory rooms at Ohio State University for over-plump co-eds. Each "patient" receives 1,500 calories a meal, and no more.

CHESS TEAM DRAWS  
CITY CLUB PLAYERS

Weidner, Beohner, and Calvert  
Successful in Games

Playing its second scheduled match of the season, the Technology chess team played a draw with the chess team of the Boston City Club in a tournament Friday night at the City Club. The score was three to three. Henry J. Weidner '33, Harry L. Beohner '30, and Benjamin G. Calvert winning for the Institute.

Weidner, playing number one board, defeated Jacobs of the City Club in a game featured by brilliant knight play. Harry L. Beohner and Benjamin Calvert were both successful in quickly played games. Refusing a draw offered him after a hundred moves by his opponent, Serge E. Kondrashoff G, finally resigned to Mr. Case. Frank Speir, '32, manager, succumbed by one pawn to Mr. Nute who twice conquered the world's chess champion, Dr. Alexander Alekhine, when he played in Boston last year. This game was marked by extreme carefulness on the part of both players. Nathan Rosen G lost a keenly played game to Taylor of the City Club.

Next Friday night, December 13, the Institute team will meet the chess team of the Cosmopolitan Chess Club at 8:30 o'clock in the East Lounge of Walker Memorial. The members of the Cosmopolitan Chess club are the former members of the Old Boston Chess Club.

In a campus problem speech a student at Kansas argued "The Uselessness of Women in College," and was presented a silver loving cup by the women's student government association. Appealing that women were misfits on the campus, the apparently cynical student wound up saying that they neither benefited the university nor themselves by their presence.

## NOTICES - ANNOUNCEMENTS Of General Interest

**Colloquium** **Mr. B. P. Romain**  
**Monday, December 9 and Tuesday, December 10, 2 P. M.,**  
**Room 4-213**

A colloquium on "The Development of the Indicating Wattmeter" will be delivered by Mr. B. P. Romain, of the Electrical Engineering Department Weston Electrical Instrument Corporation.

The colloquium is open to members of the instructing staff, graduate and senior students and the junior honors group.

### Washington Plan

**Our National Capitol, Past, Present and Future**  
**Monday, December 9, 4:30 P. M., Rogers Building,**  
**491 Boylston Street, Boston**

A film entitled the "Washington Plan" will be exhibited. Professor R. E. Rogers will read selections from the speeches of Secretary Mellon and President Hoover in connection with the showing of the film.

Open to students and members of the instructing staff.  
Tickets may be procured at the Information Office, Room 10-100.

## CALENDAR

**Monday, December 9**

4:30—"Washington Plan", moving picture, Rogers Building  
3:00—Lecture, "Discoveries at the Niya Site," Rogers Building

**Tuesday, December 10**

5:00—Lecture, "The Egyptian New Empire," Rogers Building  
6:00—A. I. E. E. Dinner Meeting, North Hall, Walker Memorial  
6:00—Boat Club Dinner, Grill Room, Walker Memorial  
7:30—Tech Show Cast Rehearsal, Walker Gym

**Wednesday, December 11**

6:00—C. E. S. Dinner, North Hall, Walker Memorial  
7:30—Brown-Technology Basketball Game, Hangar Gym

## UNDERGRADUATE

### WANDERING GREEKS

Technique wishes to announce that a booklet has been placed in the Main Lobby on which all "Wandering Greeks" are requested to sign their names.

### CHESS TOURNAMENT

The first round of the Chess Club tournament will end Wednesday, December 11. All those who have not played their matches by that date will be ruled out of the tournament.

### M. I. T. A. A.

The following men still have varsity awards waiting them in the M. I. T. A. A. office.

C. A. Fearuside '31  
W. W. McDowell '30  
I. F. Delahuty '30  
C. W. Gutierrez '31  
F. A. Merrill '30  
R. W. Ide Jr. '30  
R. Lamorette '31  
P. F. Riley '30  
J. E. Chibas '31  
S. C. Gawlowicz '31

### CROSS COUNTRY TEAMS

All members of both Varsity and freshman cross country teams are requested to report to Room 11-004 in the basement of the Homberg Infirmary at 5 o'clock today. At this time the group pictures will be taken and the election of a Varsity captain for 1930 will be held. Please bring uniforms.

### C. E. S. SUPPER MEETING

A supper meeting of the Civil Engineering Society will be held in North Hall, Walker, Wednesday, December 18, instead of December 11 as previously stated. A meeting of the officers of the Civil Engineering society will take place Monday, December 9, at 5:00 P. M. in Room 1-238. Immediately after the meeting the Technique picture will be taken.

### VARSITY BASEBALL

A meeting of men interested in varsity baseball will be held today in the Hangar Gym at 5 o'clock. All positions are open. Come out.

### FRESHMAN SOCCER

A group picture of the freshman soccer team will be taken in the basement of the Homberg Memorial Infirmary Tuesday December 10th at 5:30 p. m.

The following students have been registered at the hospitals and the Homberg Memorial Infirmary the last few days:

William Barker, '32  
Charles G. Rice, '31  
Eugene L. Sahnd, '30  
Robert G. Sauerwein, G  
Ricardo Serrano, '33  
At Brooks Hospital  
James Nolph, '33  
At the Homeopathic Hospital  
John M. Hanley, '30  
Wilber B. Huston, '33.

### TECH SHOW CAST

There will be a rehearsal of the Tech Show Cast in the Walker Gym Tuesday at 7:30.

### TECH SHOW CHORUS

The rehearsals of the Tech Show chorus will be held in the Walker Gym Wednesday and Thursday at 7:30.

### TECH SHOW CHORUS

There will be chorus rehearsals Wednesday and Thursday, Dec. 11, 12, in Walker Gym at 7:30 o'clock.

## LOWELL INSTITUTE CONTINUES SERIES

Continuing in his series of Lectures, Sir Aurel Stein, Fellow of the British Academy, will speak on "Discoveries at The Niya Site" today at eight o'clock in Huntington Hall, Rogers building. To-morrow George A. Reisner, Professor of Egyptology in Harvard University, Director of the Harvard University Museum of Fine Arts expedition, will deliver the seventh of his series of eight lectures. He will speak on "The Egyptian New Empire: The Egyptianization of Ethiopia." This lecture will also be given in Huntington Hall, but will start at five o'clock in the afternoon.

Tickets may be secured free of charge by applying by mail to the Curator of the Lowell Institute, 491 Boylston Street, and enclosing one stamped, addressed envelope for each ticket desired.

The restriction on the use of automobiles at the University of Michigan has recently been amended to apply also to airplanes. Students are now allowed to fly only for commercial purposes or when they must do so in order to qualify for a commercial or transport pilot's license. In these cases a special permit is issued.

The following tenets for the conduct of publications have been set down by the Board of Control at the University of Michigan: (1) To keep in mind the best interests and good name of the University; (2) To do the utmost possible to obtain facts and all the facts, and avoid misinterpretation from partial information; (3) To avoid an obviously partisan attitude, but with freedom of fair criticism and comment; (4) To maintain proper standards of good taste and good judgment.

At Loyola University of Chicago they have a No Cut Club, in which each member is fined 25 cents for every class he cuts. The treasurer collected \$15 the first week, and several of the members are already approaching a state of bankruptcy.

An archaeological expedition from the University of Michigan is excavating on the site of the ancient city of Selucia on the Tigris in Mesopotamia. One of the graves found in a large tomb has yielded a rich find of precious ornaments, beads, and other articles of great value to the archaeologist.

## THE TECH OPPORTUNITY FOR G. E. FELLOWSHIPS OPEN TO SENIORS

**Charles A. Coffin Foundation  
To Make Annual Awards  
To Graduates**

**MINIMUM VALUE \$500**

Applications are now being made for the Charles A. Coffin Fellowships for 1930-1931. These fellowships are awarded annually in the field of Electricity, Physics, and Physical Chemistry by the Charles A. Coffin Foundation, which was established some years ago by the General Electric Company.

The terms of the foundation make provision for the award of five thousand dollars to graduates of the universities, colleges, and technical schools throughout the country who have shown, by the character of their work, that they could, with advantage, undertake or continue research work in educational institutions either in this country or abroad. The committee in charge is particularly desirous of awarding these fellowships to men who would be unable to go into the work without financial assistance.

The fellowships carry an annual award of not less than five hundred dollars. The allowance may be increased to meet the special needs of applicants to whom the committee decides to award the fellowships.

Candidates must file applications on forms provided for the purpose, and obtainable from the secretary. The Committee requests that all applications be sent to the Dean of the school which the applicant has been attending. They also desire that the Dean, when sending in the applications, name the two men who in his opinion are the best qualified to receive the award.

Applications should be filed with the Committee not later than March 1st, 1930, and should be addressed to the Secretary, Charles A. Coffin Foundation, Schenectady, New York.

## PROFESSOR LINDGREN RETURNS FROM TOUR

**Geology Department Purchases  
2-Circle Goniometer**

Professor Lindgren, head of the department of Geology, has just returned from a month's tour of Sweden and several other foreign countries. While in Sweden he met many of the leading geologists of that country and attended a number of meetings at which geological questions were discussed.

At one of the meetings a paper was read on the principal iron ore deposits of Sweden. The most important deposit of ore is located north of the Arctic Circle and is known as Kiruna. Sweden exports about seven million tons of iron ore to Germany, England, and the United States. The ore is very valuable due to the fact that it contains sixty per cent iron.

The geology department is purchasing a 2-circle goniometer at an expense of \$800.00. This instrument is used in metallurgy and mineralogy to analyze crystal structure.

## MEETING SCHEDULED FOR CORPORATION XV

**Speaker to Discuss Depressed  
Business Conditions**

Opening with their first program of the year the stockholders of Corporation XV will have Mr. Leon V. Alden as the speaker at a dinner meeting this Wednesday at 6:30 o'clock at Durgin Park. A subject which is of vital importance to present business conditions has been chosen and in "Depressed Business Conditions" the speaker will explain the situation in which products are being marketed. Mr. Alden, a consulting engineer for the Thompson Lichter Company, has prepared an address on this subject for the New England Conference, and his knowledge of the condition may be taken as expert advice. According to many important men, business conditions will remain as black as it now exists, so that the points Mr. Alden makes will refer to the future as well as to the immediate present. Signups for the banquet must be made in Room 1-150.

Knute Rockne attributes much of the success of his football teams to the absence of co-eds at Notre-Dame. He says that this is the one outstanding influence which, more than any other single factor, insures repeated victories.

The building which houses the Student Union at Purdue University has just been completed after 17 years of planning and work. Due to difficulty in raising funds, the actual construction of the building took over eight years.

## Luxury of Bathtubs First Introduced In United States by Adam Thompson

**Bathing Prohibited in Boston  
Except by Prescription**

To the number of unsung heroes of the past should be added the name of Adam Thompson for to him belongs the credit of building the first bathtub in the United States. According to Stanley A. Smith, head of the Washington State College department of architectural engineering, Thompson not only built the first bathtub, but he took the first bath in it.

"On December 20, 1842, Thompson immersed himself in his crude, lead-lined tub," Professor Smith declares. "He was so delighted with this new sensation that he immediately decided to have a party on Christmas eve and accordingly invited a number of friends just as Earl Carroll did years later. Four of the party, who were considered braver than the rest, took a bath; and the astonishing thing was that nothing happened to them."

### Newspapers Ridicule Tubs

"The news spread. People from all

over the country came to see this new contrivance. Then the knockers began to knock. Newspapers said that a bath a day would ruin the democratic simplicity of the republic. Doctors predicted that all sorts of ailments would follow bathing. Had Adam Thompson introduced his bathtub a few centuries earlier the chances are he would have been burned at the stake along with some of the Salem witches.

### Bathing Prohibited in Winter

"The city of Philadelphia lacked only two votes in their common council for the prohibition of bathing from November 1 to the middle of March. Virginia placed a tax of 30 dollars a year on every tub brought into the state. Boston, cultured Boston, made bathing unlawful except upon medical advice. Imagine us calling on our family doctor for a prescription to take bath! But in spite of this opposition by 1860 every first class hotel in New York city boasted of one bathtub. Now they advertise one thousand rooms with one thousand baths."

## Voo Doo Abandons Wit and Turns to Childlike Anger

**Failing to Amuse, Phos Makes  
Feeble Attempts at  
Backbiting**

(Continued from Page 1)

In voo doo office are getting too damned conciderate. They let us see the page proofs in advance, and they never rite any jokes slurring THE TECH any more. Lets play them a shooty trick and give them an unnecessarily insulting notice for their next issue."

Then said D. T. Howard, "That's a swell idea, D. T. They can never blame us. We'll just say some dumb frosh put it in. Ha. ha. Ain't it?" Then the Lunger shuffled slowly away, chuckling and slobbering.

And thus in the words of some "Voo Doo" humorist, is divulged the whole scheme. If it were not so carefully labelled, we should call it a typical example of the stuff which enjoys such general criticism at the Institute. Until "Voo Doo" writers are capable of producing some real humor, the days of this publication are numbered.

### "BOOK REVIEW"

Hudson E. E. E. Tables—D. T. Popover

The treatment of this subject is in Mr. Popdown's usual rollicking style. His chapter on partials is without doubt the most amusing and mirth-provoking opus yet penned by mortal hand. It must be admitted that the phraeology used more than makes up for mathematical inaccuracies. All in all its a rotten a tempt at chicken raising and can be obtained under plain cover in 10-250.

Of course the fact that Book Reviews have not been run in THE TECH during the last volume did not enter the head of the writer. Which proves that a more careful perusal of the newspaper might shed some light on the whole subject.

Such is the character of "Voo Doo's" efforts at burlesque. Although we are in possession of the entire copy for the supplement, we hardly care to bore our readers further discussing such feeble literary efforts.

We apologize for having already taken too much valuable news space for the purpose of voicing editorial opinion on the crude rantings of a jealous publication. As to the reason for the whole affair, as set forth in Mr. Sibley's tirade, we will let the student body pass judgment on the subject.

"Voo Doo" might much better confine its efforts to cleverly humorous literary work, rather than using the magazine to foster an inter-publication quarrel. In taking the first step, the comic's board is altogether to blame for opening an old and altogether fruitless struggle for which we have no taste.
